PROJECTS

DIY Hub — *A place for users to share and find new DIY projects.*

Completed October 2018 - [github.com/marberry/DIYHub](#) - [DIYHub.fun](#)

A group project developed with React, React Native, Redux, Node.js, Express, PostgreSQL and AWS. An app to inspire new DIY projects while sharing the amount of investment in terms of time, effort and cost.

CREATE — *A website for a 3 year teacher residency program.*

Completed October 2018 - [createteacherres.48in48sites.org](#)

A group hackathon project as part of the 48in48 Atlanta nonprofit hackathon. In 48 hours we developed a full website for CREATE using Wordpress and the Beaver Builder theme.

DGDG — *A goal management system focused on bettering the user.*

In Progress October 2018 - [github.com/marberry/DGDGReactapp](#)

A personal project developed with React, Redux, Node and PostgreSQL. I aim to develop a goal management system where users can easily log their daily progress towards achieving those goals and bettering the community.

Plunder — *An online marketplace focused on safety.*

Completed September 2018 - [github.com/marberry/PlunderApp](#)

Team leader responsible for graphic design elements, overall UX, concept development, authentication, construction of SQL database, building a backend server and Google Maps API integration.

Hidden Gem Atlanta — *A way for locals to support local businesses.*

Completed July 2018 - [github.com/marberry/HiddenGemAtlanta](#)

Team member responsible for graphic design elements, overall UX, concept development and front end JavaScript.

EXPERIENCE

Sage Woodfire Tavern, Atlanta, GA — *Assistant General Manager*

November 2016 - April 2018

Managed the daily operations of a 2 million dollar a year restaurant while ensuring that each guest experienced an individualized dining experience. Here I developed a strong sense of communications, team building and conflict resolution.
